

Why use a dietary supplement?

In order to answer this question, it is important to understand how the human body is composed. In general, we consist of almost 70 % water, 16 % proteins, 10 % lipids (fats), 5 % minerals, 1.2 % carbohydrates (sugar) and 1 % nucleic acids (e.g. DNA).

Since we constantly sweat from all pores - sometimes more sometimes less - these so-called „substance groups“ in our body must be constantly renewed. Although we take in some essential nutrients through our daily diet, many micro-nutrients (vitamins, minerals, etc.) are largely missing. Analyses carried out regularly in medical practices show that in almost all cases patients have deficits of single or even several micronutrients.

The intensive agriculture of the last decades has subjected farmlands to an excessive rhythm of production, exploiting them to an extreme extent. Today's modern fertilization practices do not take the necessary vital substances into consideration at all, or only to an insufficient extent.

Many types of fruit and vegetables are harvested well before they reach maturity, often hindering the natural ripening process that occurs in sunlight, and the production of numerous nutrients and vital substances. And anyone who frequently eats fast food or ready meals can be sure to suffer, sooner or later, from a lack of vital substances.

E-SMOG-Protected

This product is provided with a special technology - developed in cooperation with Memon[®] bionic instruments GmbH - that protects against negative effects produced by electromagnetic fields.

ESORI vitamins is a multivitamin product which supplies the body with vitamins and antioxidants such as OPCs. Various red berries give the product its unmistakable, spicy taste. Special features include ingredients obtained by the Cultavit[®] process.

HIGHLIGHTS

- Multivitamin product containing a red berry complex
- Group B vitamins obtained through the Cultavit[®] process
- OPCs (oligomeric proanthocyanidins)
- Resveratrol
- Anthocyanidins
- Polysaccharides
- No coloring, no added sugar
- E-SMOG PROTECTED by Memon[®]
- Vegan

FEATURES AND INTERESTING FACTS

» A new discovery: buckwheat!

Buckwheat, in Latin *Fagopyrum esculentum*, which has been cultivated in Europe and Asia for centuries, in recent years has experienced a true renaissance. Since it does not belong to the same family as wheat - despite its similarity in name - and therefore does not contain gluten, the flour obtained from its seeds is becoming more and more important and popular.

» The special Cultavit[®] process

Organic buckwheat is germinated in a nutrient solution containing vitamins and/or trace elements. These sprouts have proven to be particularly receptive and robust. If they are placed in a nutrient-rich, aqueous environment, they begin to grow when the proper temperature and environmental conditions are maintained. During germination, the substances are absorbed into the seedlings (= titration). This process is closely observed, controlled and interrupted at the most appropriate time. After drying, the sprouts are milled and prepared for production.

» Cultavit[®]-V

ESORI vitamins contains Cultavit[®]-V, a dry extract of BUCKWHEAT SPROUTS (*Fagopyrum esculentum* Moench - fruit) titrated in **B-Complex vitamins**.

» Plant extracts and juices,

ESORI vitamins also contains important dry extracts and juice powders obtained from:

- GOJI (*Lycium barbarum* L.) dried fruit extract titrated at 40% in **polysaccharides**
- BLACKBERRY (*Vaccinium myrtillus* L.) dried fruit extract titrated at 15% in **anthocyanidins**
- ACEROLA (*Malpighia glabra* L.) dried fruit extract titrated at 50% in **Vitamin C**
- BAMBOO SHOOTS (*Bambusa vulgaris* Schrad. and *Bambusa bambos* (L.) Voss, in varying proportions) dry extract titrated at 70% in **silicon dioxide**
- JAPANESE KNOTWEED (*Polygonum cuspidatum* Siebold & Zucc.) dry root extract titrated at 98% in resveratrol
- GRAPES (*Vitis vinifera* L.) dried seed extract titrated at 90% in **OPCs**
- BLACK PEPPER (*Piper nigrum* L.) dried fruit extract titrated at 95% in **piperine**

» Directions for use

It is recommended to take one or two sachets of the product per day diluted in 150/200 ml of water at any time of the day.

» Content

180g / 30 x 6g sachets

» And there is more...
